

# Probe Rack

for Zeiss probe configurations

Designed for use in the manufacturing environment and the metrology room. Adjustable and extendable, with a great variety of accessories.

**Room for 30 probes and more.** Store your probes with Zeiss adapter plates in a safe place on the shop-floor.

**Highly versatile.** 30 storage locations on five levels, vertically and horizontally adjustable. Expandable by practical accessories.

**Sturdy steel rack:**

Dimensions 950x400x1950 mm (WxDxH), color light gray.

**Your benefits**

- Safe storage of styli and extension
- Flexible adjustment
- Great variety of accessories

## Sturdy, shop-hardened, economical

### Probe Rack with accessories

The new, sturdy probe rack is designed for shop-floor use. Its basic equipment includes 30 probe sockets on five vertically adjustable racks. Dedicated accessories are available for your specific requirements:

- Additional probe sockets can easily be mounted. Long probes can be suspended vertically, if you simply mount the appropriate socket accordingly.
- Spare probes and extensions can be stored on

practical pallets of different sizes (option). The pallets can be mounted vertically and horizontally.

- A workshop tray keeps things tidy and provides the required tools for on-site probe assembly (option).
- Additional storage racks are retrofittable quickly and without any problem.

#### Probe rack complete with probe sockets
